3. JOB EXPERTISE

- **expertise_Job: JOB EXPERTISE**

Did the minister have a relevant job experience in the portfolio area before being appointed?

none: The minister had NO related professional expertise

[No related professional/job position]

some: The minister had MODERATE related professional expertise

[Short-term OR low-ranking related professional/job positions]

ample: The minister had CONSOLIDATED and HIGH-RANK related professional expertise

[Long-term AND high-ranking related professional/job positions]

This variable identifies whether the minister had relevant job experience in the thematic area of the portfolio prior to their appointment. It answers the question: "Did the minister have significant work experience in the specific area of the portfolio before being appointed?" The purpose is to assess the connection between the minister's prior work and the responsibilities of their position.

GUIDING (related professional) POSITIONS

(If you find other positions that fit our definition, let me know)

TOP Related job positions:

- **A) Ministers and secretaries of related areas**

- **B) Professionals with recognized standing in a field directly related to the portfolio, such as:**

Examples:

- *A leading economist appointed as Minister of Economy.*
- *A renowned law professor appointed as Minister of Justice.*

- **C) Leadership in key institutions, including:**

Examples:

- *Chairs of parliamentary committees directly linked to the policy area.*

- *Heads of sectoral associations (e.g. president of the association representing the defense and security sector who became Defense minister)*
- *Ambassadors (who became Minister of Foreign Affairs)*

OBS:

- 1) *Positions like ministers -and many others- are "multi" indicators (the same positions can be use to capture for both professional and managerial expert)*
- 2) *Pastas específicas*
 - ➔ *Para PM: Codificar como "ample"= se foi previamente PM.*
- 3) *Para aferir se existe relação com pasta ministerial (se a posição é 'related')*
 - a) **Deputados:** *examinar se participou de comissões na área da pasta verificar o registo de actividade dos deputados no site da Assembleia da República e confirmar as comissões parlamentares a que pertenceu (é possível fazer o mesmo para os deputados europeus).*
 - b) **Ministros adjuntos** *(sem especificação temática): olhar para as áreas das suas secretarias.*

- **expertise_Job_type: JOB EXPERIENCE PRIOR TO APPOINTMENT**

This variable identifies the occupation or type of job the minister held prior to their appointment, understood as the specific professional activity from which they earned their livelihood. It answers the question: “What was their job? What did they live on before being appointed?”

We are interested in identifying: (i) the actual job or occupation, not the education background (e.g., “lawyer” indicates that they worked as a lawyer); (ii) the main occupation, not all occupations held throughout their life; (iii) the most recent occupation prior to appointment, not their entire career path.

Our focus is on detecting the predominant occupations at the time of appointment. In cases of multiple dominant occupations (whether simultaneous or alternating in a consistent way), separate them with an underscore (_), listing the most relevant or predominant one first.
